BUMPERS ARE THE FIRST LINE OF DEFENSE AT ANY LOADING DOCK

The loading dock is where product is handled and profits are stored. So, safety, efficiency, and structural integrity are priority concerns. Our dock bumpers provide the extra level of protection between the back of the truck and the face of the building.

PROTECT YOUR BUILDING

Bumpers prevent building damage and eliminate costly repairs caused by the impact of incoming trailers.

PROTECT YOUR EQUIPMENT

By absorbing the impact of incoming vehicles, bumpers protect dock equipment from premature wear and damage.

PROTECT YOUR INVESTMENT

Installing bumpers is an inexpensive way to protect your investment and support loading dock efficiency. Reduced downtime also equals greater productivity – and profitability.

MORE PRODUCTS

We provide a wide range of products that enable a more effective bumper installation under varying site conditions. We also provide various other products, as well as customized products on demand.

SPECIALIZED KEYHOLE FENDER

Keyhole rubber fenders are used worldwide and they offer very reliable protection to pipelines, along with other multi-purpose uses. These fenders are abrasion-resistant, strong and highly resistant wear and tear.

Product Details

- Available in sizes: 200x200mm, 250x250mm, etc.
- Ideal for situations where it may not be possible to protect the dock.
- Ideal for protecting pipelines, cables.

ROAD BUMPER

Rubber Speed Breakers are very compact and have high resistance capacity to withstand severe impacts. Bumper build-outs are recommended when more projection is needed due to sloped approach.

Product Details

- Available sizes: (L) 500 x (W) 400 x (H) 50mm / (L) 500 x (W) 400 x (H) 75 mm
- Color: Black & Yellow Combination

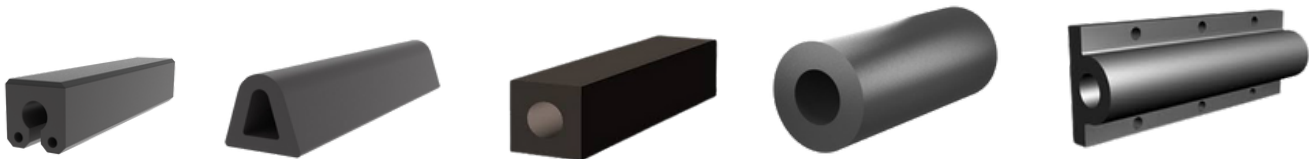

BUMPER WITH UHMWPE FACIAL PAD

Bumpers with UHMWPE facial pad are used where more friction is persistent. These fenders are abrasion-resistant, strong and highly resistant wear and tear.

Product Details

- Available in extensions of 2", 4", 6" and 8" (51mm, 102mm, 152mm and 203mm)
- Made to measure for ideal application compatibility

We manufacture customized products on demand.
